

Compare for Yourself.

the best

CALEFACTIO

The Better Expansion Tanks

COMPARE

Exclusive extra-large, plate-nut connector
is easy to install and prevents leakage compared to other manufacturers.

Full acceptance, heavy duty bladder holds almost twice the capacity of competitor's diaphragm models

Injection molded, tank will withstand high temperatures. Compatible with water/glycol mixtures (up to 50%), solar and cooling systems.

competitor's puny diaphragm doesn't compare.

Strong welded steel construction
will withstand high pressure loads and adds safety to your installation. Tanks are sturdy and built to last, while at the same time being light-weight, easy to handle and simple to install.

Resistant electrostatic paint finish
for an attractive look in addition to being durable.

Factory precharge on all models
Suits most common installations. Can be manually adjusted on-site.

Best price - 5 year warranty
You'll pay less but get more dependability and long life.
